Accounting is based on the principle of two-sided. In order to carry out business activities, the company needs funds; these funds must be given to the company by someone. The funds owned by the company are called assets. Part of these assets is provided by the owner, total amount of funds contributed by him is called owner's equity or capital. If the owner is the only one who contributed ...

## **Lesson 1: Definition of Accounting**

Preparing an unadjusted trial balance is the fourth step in the accounting cycle. A trial balance is a list of all accounts in the general ledger that have nonzero balances. A trial balance is an important step in the accounting process, because it helps identify any computational errors throughout the first three steps in the cycle.
