About Clinical Hematology Stanford's Clinical Hematology Laboratory performs a wide variety of basic and advanced hematology testing on whole blood, serum, urine, cerebrospinal fluids and other body fluids.

Hematology Laboratory - Pathology

Clinical Hematology Laboratory. The Hematology Laboratory provides routine hematology assays for Yale Medical Center patients and specialty hematology testing for both the Medical Center and Outreach. Standard consultative diagnostics in the Hematology Laboratory include:

Hematology < Laboratory Medicine

Hematology, the study of blood! Blood is considered the largest organ in the body and the normal range for total blood in the body is about 4-6 liters. When a tube of blood is centrifuged to separate it, blood is comprised of about 55% plasma, 44% red blood cells (RBCs), and 1% white blood cells (WBCs). For the clinical laboratory scientist it is critical to know hematology normal values, and that's where we'll start.
