Group therapy involves one or more psychologists who lead a group of roughly five to 15 patients. Typically, groups meet for an hour or two each week. Some people attend individual therapy in addition to groups, while others participate in groups only.

Psychotherapy: Understanding group therapy

Attack therapy is a type of psychotherapy evolved from ventilation therapy. It involves highly confrontational interaction between the patient and a therapist, or between the patient and fellow patients during group therapy, in which the patient may be verbally abused, denounced, or humiliated by the therapist or other members of the group. The method has been used by groups such as Synanon, Odyssey House, Straight, Inc., the John Dewey Academy, Élan School, DeSisto School, Amity Circle ...
