Read Free Mastering Metrics The Path From Cause To Effect

Many obstacles litter the path from cause to effect, and the raw data often refuse to reveal the way to causal enlightenment. In a new book written primarily for undergraduate economics students (but also, we hope, for policy makers and an economically literate citizenry), we explain how masters of the 'metric trade uncover reliable evidence of causal connections.

Joshua Angrist Jörn Steffen Pischke

Mastering 'Metrics is an engaging, fun, and highly accessible guide to the paradigm of causal inference." --David Deming, Harvard University "Few fields of statistical inquiry have seen faster progress over the last several decades than causal inference.

Metrics are the network variables used in deciding what path is preferred in terms of these metrics. For some routing protocols these metrics are static and may not be changed. For other routing protocols these values may be assigned by a network administrator. The most common metric values are hop, bandwidth, delay, reliability, load, and cost.
