The scripts can be programmed differently depending on what is needed for the project. When creating a local multiplayer game, one player usually has one side of the keyboard, such as the number keys or arrow keys, and the other player has the other side of the keyboard, such as the W, A, S, D, and/or F keys. This makes the game easier to play.

Project Tags, a feature of 1.x and 2.0, were labels to help categorize projects shared on the Scratch Website. Users could post a maximum of three tags on each of their own projects. In 3.0, this feature has been replaced with a hashtag system; preceding a word with a hashtag automatically creates a link to the search results for that word.
