US Army Metal Machinist Careers. September 30, 2008 By admin 3 Comments. Machines and equipment need maintenance, and the US Army metalworker machinist specialist is the person that is tasked to help repair and replace elements on Army equipment that breaks. Anytime you have missions using equipment over and over, there will be breaks and damage, and it is the specific job of the US Army machinists to repair these items and make them like new again.

US Army Metal Machinist Careers | US Military

a. General . The lathe is a machine tool used principally for shaping articles of metal, wood, or other material. All lathes, except the vertical turret type, have one thing in common for all usual machining operations; the workpiece is held and rotated around a horizontal axis while being formed to size and shape by a cutting tool.
